DETAILED ACTION

1. Claims 1-30 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Shibutani US 2003/0002518.

As to claim 1, Shibutani teaches a system for saving power in a wireless network, comprising:

an access point (Figure 1, AP) having a priority queue (scheduling result, [0076]); one or more stations (Figure 1, AT);

an SIV frame comprising:

one or more schedules of wake-up times, corresponding to the one or more stations; and

an algorithm for calculating the transmission time of downlink data for the stations.

Application/Control Number:

10/600,673 Art Unit: 2115

wherein the access point originates and transmits to the one or more stations the SIV frame of the scheduled wake-up times having a transmission order based on the transmission time calculation stored within the priority queue of the access point, and wherein the one or more stations selectively awake from a sleep mode for data transmission therewith based on the schedule ([0076]). The transmission time is inherently calculated as the slots assigned in the scheduling result.

As to claims 2-17 Shibutani clearly teaches the claimed limitations either individually or in combination.

As to claim 18, Shibutani teaches the system in claim 1 supra. As such, Shibutani teaches the method for operating the system.

As to claims 19-30, Shibutani clearly teaches the claimed limitations either individually or in combination.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaweed A. Abbaszadeh whose telephone number is (571) 270-1640. The examiner can normally be reached on Mon-Fri: 7:30 a.m.-5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on (571) 272-3667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
